ABOUT THE SUMMIT

Maharashtra has been in the forefront in sustaining industrial growth and in creating an environment conducive to economic development. Investment-friendly industrial policies, excellent infrastructure and a strong and productive human resource base have made it a favoured destination for the manufacturing, export, distribution and financial service sectors. Furthermore, the State has focused on the development of industrial and social infrastructure. Maharashtra's economic growth can provide significant contribution in the development of the nation.

Despite many achievements, a number of projects are yet to take off. Sick industries are to be revived, steps are to be taken for provision of adequate social and physical infrastructure, skill development amongst young generation and entrepreneurial education. The sustainable growth initiative will encourage Maharashtra to improve governance, Raise educational standards, Control inflation, introduce a credible fiscal policy, liberalise financial markets, Increase trade with other states, Increase agricultural productivity Improve Infrastructure and Environment which will facilitate Maharashtra to become an investment friendly state.

Eminent personalities from various fields will address the Summit to impart knowledge and provide information about the need for development and suggest solutions to the hindrances that hampers the progress of Maharashtra in retaining its position as an attractive destination for investment, industrialisation and other business activities. This summit will help to chart out a plan for overall developmental activities in various sectors in Maharashtra.
